Compression Fitting 22 mm Pex pipe 20x2

Compression fittings are used in plumbing and heating systems to connect plastic pipes (Pex or Alu-pex) on manifolds or radiator valves. The compression fittings consist of a brass nut, brass ring and brass adaptor.

Code

1450-1-08-01 Pex pipe 20 x 2

Max. working pressure: 10 bar
Temperature range: 0 - 95°C
