

Expansion Vessel Console EVC - Wivak

WIVAK

Expansion Vessel Console EVC - Wivak

Steel coated console with wall plate to connect expansion vessels up to and including 25 litres to a wall.

The console has a $\frac{1}{2}$ " air-vent and 15 mm compression connection for the water pipe. Also a $\frac{3}{4}$ " quick-release coupling (EVC) and Filling Valve (WIVAK 2000) is mounted. The WIVAK 2000 makes it very easy to fill up the system. Just connect the water hose on the filling point of the Filler and check the bar pressure.

The EVC makes it possible to check, if needed to replace, easily the correct working of the expansion vessel without draining the entire system.

Colour: White (RAL 9010)
