

Boiler Safety Unit DN20

DUCO

Boiler Safety Unit DN20 G^{3/4} x G^{3/4}"

The Boiler Safety Unit is installed in connection with domestic water heaters (fired by electric, gas or oil) and must be fitted to the cold water inlet.

The purpose of the use of this safety unit is

- 1) supply of water
- 2) being able to shut off the supply line
- 3) protecting against overpressure of the water heater
- 4) preventing warm water from flowing back into the cold water supply line.

The Boiler Safety Unit can be mounted vertically or horizontally.

Before installing the Boiler Safety Unit please check our installation instructions.

Continuous operating temperature max. 65°C/peak load max. 90°C (1 hour).

Max. cap. 6.975 L/h. at 1 bar (100kPa) differential pressure.

In accordance with the EN 1488 the Boiler Safety Unit available in 6, 7, 8, 9 and 10 bar.

- 1 Arrow flow direction
- 2 Shut-off valve
- 3 Check Valve test plug
- 4 Relief valve
- 5 360° Rotatable funnel
- 6 Adapter flexible hose
